- Conference Address -

Riva del Garda Fierecongressi Parco Lido I-38066 Riva del Garda, (TN) Italy	Tel.: E-mail: Web:	+39-0464-520000 (Info Desk) info@rivafc.it http://www.rivadelgardafierecongressi.it

- Symposium Office -

The Symposium Office is located in the entrance hall of the Congress Center

Opening Hours:

Sunday, May 17	09:00 until 18:00	GC×GC and LC×LC Courses
	09:00 until 18:00	21st GC×GC Symposium
Monday, May 18	08:30 until 18:50	21st GC×GC Symposium
Tuesday, May 19	09:00 until 18:35	44th ISCC
	11:05 until 18:50	21st GC×GC Symposium
Wednesday, May 20	09:00 until 18:20	44th ISCC
Thursday, May 21		
Friday, 22 May	09:00 until 13:15	44th ISCC

- Posters -

Posters will not be introduced by oral presentation.
For the **44th ISCC**, the posters will be on display from **Tuesday to Friday (8:30 till 11:00)**.

For the **21st GC×GC**, the posters will be on display from **Monday to Friday (8:30 till 11:00)**.

For discussion, please meet the authors at their numbered poster board at the time indicated in the scientific program.
Special stickers to hang up the posters are available at the Registration Desk. The use of pins is not allowed.

- Submission of Manuscripts -

Participants are invited to contribute manuscripts connected to their presented work at the RIVA 2026 Conference for publication in the Journal of Chromatography A (Elsevier) in a Virtual Special Issue (VSI) that is dedicated to the meeting.
Accepted papers will appear together as part of a dedicated collection on Science Direct.
Authors are advised to read carefully the aims and scope of the journal before deciding whether or not to submit their manuscript.

Manuscript submission instructions:

- Submission link: https://www.sciencedirect.com/journal/journal-of-chromatography-a
- Click on the "Submit your article" from the top menu;
- Enter your username and password (first time users will need to register);
- After accepting Elsevier's terms and conditions, privacy policy and the Aries privacy policy, please click on "Start a new submission" and select article type "VSI: RIVA 2026";
- Follow the remaining step-by-step instructions to submit your paper.
- Submission Open Date: **1st May 2026**
- Submission deadline **30th November 2026**.

When preparing your manuscript(s), please carefully follow the Guide to Authors of the journal, which you can find on the online submission site. In the cover letter please mention that your manuscript is intended for the **RIVA 2026** Virtual Special Issue.
Please note that all manuscripts will be subjected to the mandatory selection process for the journal selected, including the strict peer review procedure; therefore, acceptance for presentation at the meeting is not a guarantee for publication in the journal.
For any queries regarding the VSI publication, please contact Mr. Wei Yu by wei.yu@elsevier.com. We would like to thank you in advance for your contribution.

The special issue will be handled by guest editors Paola Dugo and Robert Synovec.

Book of Abstracts

The book of abstracts will be delivered on a USB upon registration

- Badges -

Delegates are requested to wear their badges at all times.
Failure to do so will result in refusal of admission to the scientific and social activities.
Blue badges have access to both GC×GC and ISCC Scientific Program. Green badges have access to the Scientific Program of GC×GC and light blue badges to the Scientific Program of ISCC. Participants registered to the GC×GC and LC×LC short courses will receive an additional badge valid only for Sunday MAY 17, 2026. Accompanying persons have no access to the scientific activities.

- Coffee Breaks–

Coffee and soft drinks will be served in the exhibition hall during the coffee break times only.

- Exhibition -

Exhibition opening hours:

Tuesday, May 19	09:00 – 18:50
Wednesday, May 20	09:00 – 18:20
Thursday, May 21	09:00 – 18:25
Friday, May 22	09:00 – 11:00

AWARDS

MARCEL GOLAY AWARD

The **Marcel Golay award** was instituted in honor of Marcel Jules Eduard Golay, the inventor of capillary columns.
The **Marcel Golay award 2026** is sponsored by **Chromaleont and RIC Group**.

Dr. Golay, one of the **pioneers of gas chromatography**, introduced the theory of dispersion in open tubular columns (capillary columns) and demonstrated their efficacy at the second International Symposium on Gas Chromatography in 1958. Dr. Golay joined PerkinElmer in 1962 as a senior scientist, and invented the Golay infrared sensor, which at the time was the most sensitive infrared sensor available.

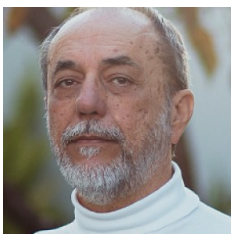
Golay's invention helped establish PerkinElmer as a major source of infrared technology. He also extended the theory of preparative columns and examined the properties of various chromatography sampling systems. The open tubular gas chromatography column is the most popular analytical gas chromatography column in use today. Dr. Golay worked as a senior scientist at PerkinElmer up until his death in 1989. The Marcel Golay award is presented to a scientist in recognition of a lifetime of achievement in capillary chromatography.

Carlo Bicchi is Full Professor at the Faculty of Pharmacy of the University of Turin since 1990. His research focuses on the development of advanced analytical technologies for the study of biologically active specialized metabolites in plant matrices, including essential oils, terpenoids, phenolic compounds, and alkaloids, as well as on aroma profiling and fingerprinting of major industrial food crops such as coffee, cocoa, hazelnuts, olive oil, and tea. His work encompasses all aspects of sample preparation, advanced chromatographic techniques, and chemometric methods for profiling and fingerprinting. Prof. Bicchi has actively promoted the development of analytical sciences through international collaboration, mentoring, and participation in scientific boards, conferences, and editorial activities.

GIORGIO NOTA AWARD

The **Giorgio Nota Award** was instituted in honor of Giorgio Nota, who first introduced open tubular LC.
The Giorgio Nota award is presented to a scientist in recognition of a lifetime of achievement in capillary liquid chromatography.
The **Giorgio Nota Award 2026** is sponsored by **Waters**.

Fernando Mauro Lanças is a full Professor at the Institute of Chemistry of the University of São Paulo at São Carlos, Brazil, where he founded and currently coordinates the Chromatography Laboratory. His commitment to promoting and disseminating the culture of chromatography in Latin America, as founder of the Latin American Congress of Chromatography (COLACRO), the Brazilian Symposium on Chromatography (SIMCRO), and the International Institute of Chromatography (IIC), has made it possible to build a lasting bridge between Latin America and the rest of the world, fostering scientific collaboration, advancing research excellence, and strengthening the global chromatographic community. His primary research interest is currently focused on the complete miniaturization and automation of sustainable sample preparation – chromatography – mass spectrometry techniques and the practical implementation of the Unified Chromatography concept.



GC×GC LIFETIME ACHIEVEMENT AWARD

The award honors an experienced GC×GC scientist who has made significant contributions to the field.
The Scientific Achievement Award was instituted in 2011 and recognizes GC×GC scientists who have 15 or more years of continuous contributions in the field.
The **2026 GC×GC Lifetime Achievement Award** is sponsored by **SepSolve Analytical, Markes International and LECO**.

Prof. James Harynuk is currently a Full Professor at the University of Alberta, Canada. His research focuses on developing advanced analytical tools to tackle challenges such as complex samples, faster analysis times, and lower detection limits. He specializes in multidimensional gas-phase separations, including GC×GC, heart-cut GC (GC-GC), and advanced data handling tools. Applications of his work span health research, metabolite profiling, forensic science, petrochemicals, and environmental science.

Christopher Reddy is senior scientist at the Department of Marine Chemistry and Geochemistry at the Woods Hole Oceanographic Institution in Woods Hole, Massachusetts. Reddy received his B.S. degree in chemistry from Rhode Island College and his Ph.D. in chemical oceanography from the Graduate School of Oceanography at the University of Rhode Island. His research focuses on the environmental fate of organic pollutants in the ocean, often using advanced analytical techniques such as GC×GC and compound-specific isotope analysis. Drawing on lessons from past pollution, he works to design safer, more environmentally friendly materials.

Robert K. Nelson is an organic geochemist invece di research specialist in the Department of Marine Chemistry & Geochemistry at the Woods Hole Oceanographic Institution in Woods Hole, Massachusetts. He earned a B.A. in biology from Central Connecticut State University and he later expanded his scientific training through additional coursework in organic chemistry at the University of Massachusetts Dartmouth and in physical chemistry at Northeastern University, strengthening his expertise in chemistry as applied to environmental sciences. With an extensive career in organic geochemistry and environmental analysis, Nelson is widely recognized for his contributions to the study of petroleum hydrocarbons and anthropogenic contaminants in the marine environment.

JOHN PHILLIPS AWARD

Comprehensive two-dimensional gas chromatograpy, or GC×GC, was invented by the late **Professor John Bruce Phillips** of Southern Illinois University at Carbondale and his then graduate student, Dr. Zaiyou Liu. The Phillips Prize will be awarded every other year to individuals who have made outstanding contributions to the field of GC×GC analysis. The Phillips Award first given in 2004 recognizes individuals who have typically worked in the GC×GC field for less than 10 years but have demonstrated good leadership through their scientific peer-reviewed work.
The **2026 John Phillips award** is sponsored by **LECO**.

Dr. Meriem Gaida obtained Ph.D. in Analytical Chemistry from the University of Liège (Belgium) in August 2023, specializing in separation science with expertise in GC×GC-ToFMS. Her research focused on advanced analytical strategies for complex chemical profiling and data interpretation, and she further expanded her expertise as a visiting researcher at the University of Washington (USA). After completing her doctorate, she joined SepSolve Analytical Ltd. (UK) as an Applications Specialist, where she developed and optimized customized GC×GC-ToFMS solutions for industrial and academic clients, providing technical support, method development, and training. In September 2024, she moved to LUZI AG (Switzerland), where she currently serves as Product Safety Science Manager, overseeing regulatory compliance, safety assessments of fragrance ingredients, and product safety documentation in line with European regulations.

Petr Vozka is an Associate Professor of Chemistry and Biochemistry at California State University, Los Angeles, where he directs the Complex Chemical Composition Analysis Laboratory (C3AL). He earned a B.S. in Chemistry and Chemical Technologies, and an M.S. in Chemistry and Technology of Fuels and Environment from the University of Chemistry and Technology, Prague, followed by a Ph.D. from Purdue University focused on analytical chemistry of liquid transportation fuels. His research group develops and applies advanced separation and detection strategies, especially comprehensive two-dimensional gas chromatography (GC×GC) coupled with mass spectrometry, to resolve and quantify highly complex mixtures that challenge conventional methods. Application areas include alternative and sustainable fuels, microplastics and related environmental matrices, and forensic analyses such as chemical imaging of fingerprints.

Fritz Pregl Medal of the Austrian Society of Analytical Chemistry

The **Fritz Pregl award of the Austrian Society of Analytical Chemistry (ASAC)** was established in 1955. Since then, it is awarded at irregular intervals primarily at national and international scientific events and symposia.
The medal's namesake, Friedrich Michael Raimund PREGL, received the Nobel Prize in Chemistry in 1923 for his groundbreaking work in the field of microchemical methods, which are closely linked to microanalytical applications. Fritz Pregl is the doyen of Austrian analysts. In his honor, the ASAC established the Pregl Medal, which is awarded to individuals who have made significant and outstanding contributions in the field of analytical chemistry, particularly organic trace analysis.

Prof. Christian Huber is currently professor of chemistry for biosciences at the Paris Lodron University in Salzburg, Austria. After finishing his masters and Ph.D. at the university of Innsbruck he continued as an assistant professor at this university.
In 1996 Prof. Huber spent several months researching at Yale university in the group of Prof. Csaba Horvath. A year later he was appointed Associate Professor in Innsbruck. From 2002 he held the position of Professor of Analytical Chemistry at the Department of Chemistry, Division of Instrumental Analysis and Bioanalysis, Saarland University, Saarbrücken, Germany. From there he moved to Salzburg in 2008. Prof. Huber is a worldwide known researcher with a strong focus on separation sciences in particular for the analysis of large bio-molecules. According to Google Scholar his work has been cited more than 13500 times with an h-index of 63. In recognition of his contributions to HPLC and HPLC-MS, Prof. Huber will receive the Pregl Award Medal from the Austrian Society of Analytical Chemistry.

18:35 – 18:50 **Closing Address 21st GC×GC – Room Dolomiti**
Chairpersons:

Luigi Mondello, University of Messina, Italy
Philip Marriott, Monash University, Australia

Presentation of the:
RICHARD SACKS BEST POSTER AWARDS (sponsored by LECO)
GENZO SHIMADZU Oral Awards (Young Scientists)
ABC Springer Best Poster Award (Young Scientists)
Separations MDPI Best Oral GC×GC Award (Young Scientists)

SCIENTIFIC PROGRAM 44th ISCC

Tuesday, May 19, 2026

09:00 – 09:25 **Opening Address 44th ISCC - Room Garda**
Chairpersons:
Luigi Mondello
University of Messina, Italy
Pat Sandra
RIC Group, Belgium
Alessio Zanoni
Mayor of Riva del Garda, Italy

09:25 – 10:35 **ISCC Session 1 – Awards Presentation and Lectures**

09:25 – 09:35 **M.J.E. Golay Award Presentation**
Sponsored by Chromaleont and RIC Group
Chairperson:
Pat Sandra
RIC Group, Belgium

09:35 – 10:00 **LE.01 M.J.E. Golay Award Lecture**
PLANT VOLATILES AND CAPILLARY GAS CHROMATOGRAPHY: A NEVER-ENDING STORY OF CONTINUOUS INNOVATION
Carlo Bicchi
University of Turin, Turin, Italy

10:00 – 10:10 **ASAC Fritz Pregl Medal Presentation**
Assigned by Austrian Society of Analytical Chemistry (ASAC)
Chairperson:
Christian W. Klampfl
Johannes Kepler University, Austria

10:10 – 10:35 **LE.02 ASAC Fritz Pregl Medal Lecture**
MICROANALYSIS EMPLOYING MICROSCALE CHROMATOGRAPHY AND MASS SPECTROMETRY: KEY TECHNOLOGIES FOR LISTENING TO COMMUNICATION IN BIOLOGICAL SYSTEMS
Christian Huber
University of Salzburg, Salzburg, Austria

10:35 - 11:05 **Coffee Break - Exhibition**

11:05 – 13:00 **ISCC Session 2 – NANO AND CAPILLARY LIQUID CHROMATOGRAPHY**
Room Garda
Chairpersons:
Michael Ramsey, The University of North Carolina at Chapel Hill, USA
Christian Huber, University of Salzburg, Austria

GC×GC Session 6 – FUNDAMENTALS 2
Room Dolomiti

See GC×GC program for details

11:05 **LE.03**
FUTURE TRENDS IN CAPILLARY NANO-HPLC COLUMN TECHNOLOGY
Gert Desmet
Vrije Universiteit Brussel, Brussel, Belgium

11:25 **LE.04**
NEW APPROACHES TO CAPILLARY LC COLUMN DEVELOPMENT
James Grinias
Rowan University, Glassboro, USA

11:45	**LE.05** **PORTABLE CAPILLARY LIQUID CHROMATOGRAPHY: NEW ENABLING TECHNOLOGIES FOR REAL-TIME ON-SITE AND IN-SITU CHEMICAL ANALYSIS** *Brett Paull* *University of Tasmania, Hobart, Australia*
